User Guide

D-500 Disinfectant for Hard, Non-Porous Surfaces and Animal Odor Neutralizer

DISINFECTION

Dilution: 100 ml of D-500 in 900 ml of lukewarm water

⚠️ Concentrated product – dilution required
Use the diluted solution within a maximum of 24 hours

Before disinfection

- Remove animals and empty feeders and water bowls.
- Remove heavy soiling (urine, feces, debris).

Application method

- Spray onto hard, non-porous surfaces.
- Allow to sit for 10 minutes (required contact time).
- Wipe with a clean, dry cloth or paper towel.

After disinfection

- Rinse with water any surface that comes into contact with food or water.

ACTIVE INGREDIENTS: DIDECYLDIMETHYLAMMONIUM CHLORIDE 0.75% W/W, BENZALKONIUM CHLORIDE 0.45% W/W

DIN #02505525

Animal Odor Neutralization – Indoor and Outdoor Use

Neutralize Urine and Skunk Odors Outdoors

Concrete, bricks, shrubs, pavers, and lawn (outdoor use):

- Dilute 120 ml of D-500 in 4 litres of lukewarm water.
- Using an outdoor sprayer, apply the solution to the entire area affected by skunk or urine odors.
- Allow to work and repeat if necessary.

Neutralize Pet and Skunk Odors Indoors

- Dilute 120 ml of product in 4 L of water, then clean floors (wood, ceramic, vinyl), walls, countertops, and cabinets using a mop or a microfiber cloth.
- To treat ambient air, spray the same dilution onto a clean cloth, then attach the cloth to a portable fan. Repeat until the odor has completely disappeared.

Neutralize Pet Odors on Fabrics

Machine-washable fabrics:

- Add 60 ml of product to the bleach compartment of the washing machine, in addition to the regular detergent.
